ABOUT ME

My name is Dat, I'm a final year undergraduate student majoring in IT. I'm seeking a job opportunity in web backend development. My goal is to apply the knowledge to contribute to software development and improves my skills.

SKILL

Java (Spring Framework - JSP/Servlet)

- Go: Gin, Fiber, Gorm
- Kotlin: Jetpack Compose
- TypeScript: VueJS
- Bootstrap, JQuery

- MySQL, SQL Server
- MongoDB
- Google Cloud
- Git, RabbitMQ

EXPERIENCE

VieON (Backend Intern) (07/2023 -10/2023)

- During my work experience, I have received training in the Go programming language and various frameworks for developing web backend applications.
- I participated in developing APIs for a partner website of VieON and interacting with other services in a microservices architecture to build applications.

PET PROJECTS

Recauction-web (Github)

- Spring Web + Thymeleaf + Security + MySQL + Paypal API
- This is an e-commerce website that uses a reverse auction mechanism. Users can place bids on the products they want to buy and the sellers will bid to find out who is the winning bidder in the auction session.

Tda Store Restful-Api (Github)

- RESTful API with Spring + PostgreSQL + RabbitMQ.
- TDA Web is backend application used for related TDA e-commerce applications such as mobile and web including login and authentication with JWT, and input validation, shopping cart, checkout...
